Dear Sir,

It is our immense pleasure to have your valuable interest in our Pest management service. Our goal is to deliver our best of efforts towards complete customer satisfaction with our best of domestic and commercial Pest Management Service.

Angel Pest Management believes that effective, responsible pest elimination should be equally dependent upon Chemical pesticides as well as reliant upon techniques such as exclusion, traps and surveillance.

Angel Pest Management does not wish to rely only on repeated, residual pesticide applications to form a passive barrier against would-be pest invaders. That approach ignores two flaws; One, insects develop resistance to pesticides, especially when pesticides are used repetitively in low doses. Secondly, the use of subsequent high dosages can be harmful to both human, pets and the environment. Our services have been designed with customer friendly approach.
